DETAILED ACTION

Reasons For Allowance

1. The following is an examiner's statement of reasons for allowance:

Applicants invention claims that a voltage regulator with input and output terminals has a printed circuit board a substrate mounted on printed circuit board, a first flip-flop type integrated circuit chip mounted on the substrate. The first integrated circuit chips includes a first power switch fabricated therein to alternately couple decouple the input terminal to the output terminal. A filter disposed to provide a substantially DC voltage at the output terminal, and a control circuit controls the power switch to maintain the DC voltage substantially constant. Where in the flip chip type integrated circuit chip includes a p-type region and an n-type region, and a plurality of p= regions fabricated in the n-type region in a first array and a plurality of n= regions fabricated in the p-type region in a second array and wherein alternating p= regions are connected to the input terminal, and alternating n= regions connected to intermediate terminal and to ground. None of the cited art overcomes the limitation explained above, since the claims are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
